

Gomoku (Five in a Row)

Japan

Gomoku is played using the board and counters of another, far more complicated game, Go. Go is played with a total of 361 counters!

For this version, each player will need 30 counters. Use whatever you can find. Stones, buttons, rice, anything!

How to play!

Very much like Connect 4, players take turns to play a counter trying to make a row of five while trying to block their opponent from doing the same.

First player to make a row of five is the winner!
